EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark K. Johnson on 10/14/2004.

The application has been amended as follows:

In the claims:

Claim 1. (currently amended) A process for selecting phage that are resistant to blood inactivation, comprising:

- a) mixing a blood component with a phage display library *in vitro* under phage inactivation conditions; and,
- b) selecting for phage which are resistant to inactivation by the blood component.

In the title:

The title of the application has been changed to the following:

--An *In vitro* Process for Selecting Phage Resistant to Blood Inactivation--

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: applicants' arguments and the amendment made above distinguish the instant invention from the teachings of Sahu et al. Applicants are correct to note that there is no conclusive proof that the phage taught by Sahu et al would be resistant to inactivation in blood. The amendment of claim 1 to recite that the mixing of the library and the blood component is under inactivating conditions further separates the claimed method from simple biopanning experiments, such as those taught by Sahu et al, in that the panning conditions taught by Sahu et al do not necessarily result in the inactivation of phage in the library, as is required in the instant methods (e.g. see page 31, line 10 through page 32, line 22 of the instant specification).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Claims 1, 3-4 and 7 are allowed (now claims 1-4).
